CIRCUIT THEORY AND APPLICATIONS, VOL. 2, 411–413 (1974)

CONTENTS

Volume 2, Issue Nos. 1–4

International Journal of

CIRCUIT THEORY AND APPLICATIONS

Issue No. 1, March 1974

J. D. Rhodes and M. I. F. Fahmy: Digital Filters with Maximally Flat Amplitude and Delay Characteristics 3

A. Forsén and L. Kristiansson: Analysis of Nonlinear Model for Operational Amplifiers in Active RC Networks 13

M. Bialko, W. Sienko and Newcomb: Active Synthesis using the DVCCS/DVCVS 23

K. Hirano, F. Nishi and S. Tomiyama: Some Considerations on State Equations of Linear Active Networks 39

A. S. Sedra: Generation and Classification of Single Amplifier Filters 51

A. H. Zemanian: Infinite Networks of Positive Operators 69

SHORT COMMUNICATIONS

C. R. Dillon and L. F. Lind: The Step Responses for even Degree Equidistant Linear Phase Filters 79

D. Rabrenović and V. Jovanović: Low-Pass Filters with Maximally Flat Magnitude beyond the Origin and Arbitrary Transmission Zeros 83

R. D. Parmentier and G. Costabile: Effect of Resistive Losses on Superconductive Multimode Oscillators 89

J. J. Narraway: Symmetrical State Matrices for 2-Element-Kind Networks 95

D. P. Howson: Reciprocity in Lumped Linear-Time-Varying Circuits 97

Letters to the Editor 105

Issue No. 2, June 1974

V. Belevitch and Y. Genin: Rectifier Circuits for Optimal Frequency Conversion 111

I. N. Hajj, D. J. Roulston and P. R. Bryant: A Three-Terminal Piecewise-Linear Modelling Approach to DC Analysis of Transistor Circuits 133

B. B. Stamenkovic: Synthesis of *n*-Port Active RC Networks with a Maximum Number of Capacitors 149

R. Nouta: The Jaumann Structure in Wave-Digital Filters 163

SHORT COMMUNICATIONS

N. Levan: A Note on Passivity and Losslessness 175

A. Fettweis: On Noise Performance of Capacitor-Gyrator Filters 181

L. T. Bruton and A. B. Haase: High-Frequency Limitations of RC-Active Filters Containing Simulated-L and FDNR Elements 187

H. Dieter Fischer: Current and Voltage Graphs of a Composite Graph 195

A. Fettweis, H. Levin, and A. Sedlmeyer: Wave Digital Lattice Filters 203

G. B. Lockhart: Book Review 212

Issue No. 3, September 1974

B. D. Rakovich: Designing Monotonic Low-Pass Filters—Comparison of Some Methods and Criteria 215

Wai-Kai Chen: The Inverse Laplace Transform of a Function of the *m*-Derived Filters . . . 223

M. S. Piekarski: A New Synthesis Procedure of Lossless Two-Port Networks with Reference to Integrated Circuits 231

M. A. El-Said, F. El-Bayoumi and E. A. Talkhan: Nonlinear Distortion Cancellation in Class A Junction Transistor Amplifier Stages 241

SHORT COMMUNICATIONS

A. Haas: On the Unambiguous Generalization of Kirchhoff's Laws 257

E. Hammershaimb, P. Jeppesen and H. Schjaer-Jacobsen: Computer-Aided Design of Broad Band Reflection Type Amplifiers 261

F. N. Trofimenkoff, D. H. Treleaven and L. T. Bruton: Representation of Noise in a Particular Type of Linear *N*-Port Network 269

L. Gefferth: Fault Identification in Resistive and Reactive Networks 273

F. S. Atiya and I. Hanna Ibraham: A Gyrator-RC Double-Tuned Band-Pass Amplifier . . 279

K. M. Adams and E. Deprettere: On the Realization of Gyrators by Nullors and Resistors . 287

M. Tomlinson: Realizable Filters Which Give Zero Intersymbol Interference in an FSK System 291

N. Murphy, V. K. Aatre, and V. Ramachandran: Synthesis of Low-Pass Double-Ladder Operational Amplifier Network with Prescribed Pole Sensitivities 299

A. M. Soliman: A New Active RC Configuration for Realizing Nonminimum Phase Transfer Functions 307

Issue No. 4, December 1974

A. Fettweis: Wave Digital Filters with Reduced Number of Delays 319

M. Chandrashekar and H. K. Kesavan: On the Existence of Solutions to Linear Active Networks: A State-Space Approach 331

M. F. Fahmy and J. D. Rhodes: The Equidistant Linear Phase Polynomial for Distributed and Digital Networks 341

H. J. Carlin and P. Kotiveeriah: A New Method for Approximating Passive Network Functions . 353

L. O. Chua and C-W. Tseng: A Memristic Circuit Model for P–N Junction Diodes 367

SHORT COMMUNICATIONS

H. Gaunholt: Design and Predistortion of Passive Filters by Optimization 391

J. Attikiouzel and R. Linggard: Low Cost Active Low Pass and Band Pass Network . . . 397

L. T. Bruton and J. T. Lim: High-Frequency Comparison of GIC-Simulated Inductance Circuits 401

Letters to the Editor 405

Book Review 408

Table of Contents, Volume 2 411

Author Index 415

CIRCUIT THEORY AND APPLICATIONS, VOL. 2, 415–416 (1974)

AUTHOR INDEX, VOLUME 2

Aatre, V. K., see Murphy, N., 299
Adams, K. M., and Deprettere, E.: On the realization of gyrators by nullors and resistors, 287
Atiya, F. S., and Ibraham, I. H.: A gyrator-RC double-tuned band-pass amplifier, 279
Attikiouzel, J. and Linggard, R.: Low cost active low pass and band pass network, 397

Belevitch, V. and Genin, Y.: Rectifier circuits for optimal frequency conversion, 111
Bialko, M., Sianko, W. and Newcomb, R. W.: Active synthesis using the DVCCS/DVCVS, 23
Bruton, L. T. and Haase, A. B.: High-frequency limitations of RC-active filters containing simulated-L and FDNR elements, 187; see Trofimenkoff, F. N., 269; High-frequency comparison of GIC-simulated inductance circuits, 401
Bryant, P. R., see Hajj, I. N., 133

Carlin, H. J. and Kotiveeriah, P.: A new method for approximating passive network functions, 353
Chandrashekar, M. and Kesavan, H. K.: On the existence of solutions to linear active networks: A state-space approach, 331
Chen, W-K.: The inverse laplace transform of a function of the *m*-derived filters, 223
Chua, I. O. and Tseng, C-W.: A memristic circuit model for P-N junction diodes, 367
Costabile, G., see Parmentier, R. D., 89

Deprettere, E., see Adams, K. M., 287
Dillon, C. R. and Lind, L. F.: The step responses for even degree equidistant linear phase filters, 79

El-Bayoumi, F., see El-Said, M. A., 241
El-Said, M. A., El-Bayoumi, F. and Talkhan, E. A.: Nonlinear distortion cancellation in class A junction transistor amplifier stages, 241

Fahmy, M. F. and Rhodes, J. D.: The equidistant linear phase polynomial for distributed and digital networks, 341; see Rhodes, J. D., 3
Fettweis, A.: On noise performance of capacitor-gyrator filters, 181; Wave digital filters with reduced number of delays, 319. Fettweis, A., Levin, H. and Sedlmeyer, A.: Wave digital lattice filters, 203
Fischer, H. D.: Current and voltage graphs of a composite graph, 195
Forsén, A. and Kristiansson, L.: Analysis of nonlinear model for operational amplifiers in active RC networks, 13

Gaunholt, H.: Design and predistortion of passive filters by optimization, 391
Gefferth, L.: Fault identification in resistive and reactive networks, 273
Genin, Y., see Belevitch, V., 111

Haas, A.: On the unambiguous generalization of Kirchhoff's laws, 257
Haas, A. B., see Bruton, 187
Hajj, I. N., Roulston, D. J. and Bryant, P. R.: A three-terminal piecewise-linear modelling approach to DC analysis of transistor circuits, 133
Hammershaimb, E., Jeppesen, P. and Schjaer-Jacobson, H.: Computer-aided design of broad band reflection type amplifiers, 261
Hirano, K., Nishi, F. and Tomiyama, S.: Some considerations on state equations of linear active networks, 39
Howson, D. P.: Reciprocity in lumped linear-time-varying circuits, 97

Ibraham, I. H., see Atiya, F. S., 279

Jeppesen, P., see Hammershaimb, E., 261
Jovanović, V., see Rabrenović, D., 83

Kesavan, H. K., see Chandrashekar, M., 331
Kotiveeriah, P., see Carlin, H. J., 353
Kristiansson, L., see Forsén, A., 13

Levan, N.: A note on passivity and losslessness, 175
Levin, H., see Fettweis, A., 203
Lim, J. T., see Bruton, L. T., 401
Lind, L. F., see Dillon, C. R., 79
Linggard, R., see Attikiouzel, J., 397

Murthy, N., Astre, V. K. and Ramachandran, V.: Synthesis of low-pass double-ladder operational amplifier network with prescribed pole sensitivities, 299

Narraway, J. J.: Symmetrical state matrices for 2-element-kind networks, 95
Nishi, F., see Hirano, K., 39
Nouta, R.: The Jaumann structure in wave-digital filters, 163

Parmentier, R. D. and Costabile, G.: Effect of resistive losses on superconductive multimode oscillators, 89
Piekarski, M. S.: A new synthesis procedure of lossless two-post networks with reference to integrated circuits, 231

Rabrenović, D. and Jovanović, V.: Low-pass filters with maximally flat magnitude beyond the origin and arbitrary transmission zeros, 83
Rakovich, B. D.: Designing monotonic low-pass filters—comparison of some methods and criteria, 215
Ramachandran, V., see Murthy, N., 299
Rhodes, J. D. and Fahmy, M. I. F.: Digital filters with maximally flat amplitude and delay characteristics, 3; see Fahmy, M. F., 341
Roulston, D. J., see Hajj, I. N., 133

Schjaer-Jacobsen, H., see Hammershaimb, E., 269
Sedlmeyer, A., see Fettweis, A., 203
